

SHAIK ASHFAQ ALI

Network Engineer | Cybersecurity Enthusiast | Linux & Cloud Learner

Email: syedsameerbasha789@gmail.com | LinkedIn: <https://www.linkedin.com/in/shaik-ashfaq-ali>

Phone: +91-9493400302 | GitHub: <https://github.com/AliNex-creator>

PROFESSIONAL SUMMARY

Aspiring Network Engineer with CCNA (200-301) training and hands-on experience in Routing, Switching, TCP/IP, IP Addressing, Subnetting, VLAN Configuration, and Network Security. Completed 5+ industry-recognised certifications and 100+ hours of technical training across Cisco Networking, Cybersecurity, Linux, and Cloud Computing. Designed and validated enterprise LAN/WAN topologies in Cisco Packet Tracer achieving 100% end-to-end connectivity. Skilled in Technical Troubleshooting, Network Monitoring, and DHCP/DNS configuration. Holds a Cybersecurity internship and actively pursues continuous development in emerging network and cloud technologies.

CORE COMPETENCIES

Routing & Switching | TCP/IP Networking | IP Addressing & Subnetting | VLAN Configuration | Inter-VLAN Routing | LAN/WAN Design | Network Security Fundamentals | DHCP & DNS Configuration | Cisco Packet Tracer | Network Monitoring | Technical Support & Troubleshooting | Cybersecurity Awareness | Linux Fundamentals | Cloud Computing Basics | Git & GitHub

PROFESSIONAL EXPERIENCE

Cyber Security Intern

2024 | Remote

Thiranex

- Participated in 10+ project-based cybersecurity tasks, gaining practical exposure to threat identification, vulnerability assessment, and security best practices.
- Reduced simulated incident response time by 30% through structured threat analysis and systematic documentation workflows.
- Collaborated with industry mentors on cybersecurity awareness modules, contributing to a 20% improvement in knowledge-assessment scores within the team.
- Monitored network activity logs and identified 15+ potential anomalies using security analysis tools, reinforcing Network Monitoring and Troubleshooting skills.
- Applied CCNA and Cisco Security concepts in a real-world context, strengthening understanding of LAN/WAN security, DHCP hardening, and DNS filtering.

TECHNICAL PROJECTS

Enterprise Network Design

Cisco Packet Tracer

- Designed a multi-site LAN/WAN topology connecting 3+ locations using Cisco routers and switches, simulating a real enterprise network environment.
- Configured 20+ IP addresses across 5 network segments; validated 100% end-to-end connectivity between all configured routers, switches, and end devices.
- Implemented Inter-VLAN Routing, DHCP pools, and DNS resolution across departments, reducing manual IP conflicts by 100% through proper subnetting.
- Deployed Routing protocols across 10+ network devices in Cisco Packet Tracer, achieving a stable convergence time of under 3 seconds.
- Applied Network Security Fundamentals including ACL configurations, reducing unauthorised traffic flow by ~40% in the simulated environment.

Cybersecurity Portfolio Website

GitHub Pages

- Developed and deployed a responsive cybersecurity and networking portfolio website, achieving a 95+ Lighthouse performance score.
- Integrated 5+ certification documents for online verification; the portfolio attracted 500+ professional profile views within the first month of launch.
- Automated deployment via GitHub Actions workflow, reducing manual deployment effort by 80% and ensuring consistent uptime.

Cloud Job Simulation

Cloud Platform

- Completed 8+ cloud-based practical tasks including application registration, role-based access control, and GitHub workflow automation.
- Gained hands-on exposure to cloud deployment pipelines and DevOps fundamentals, cutting simulated provisioning time by 50% through workflow optimisation.
- Demonstrated foundational knowledge of cloud infrastructure, contributing to a 90% task-completion rate across all simulation modules.

CERTIFICATIONS

- CCNA (200-301) + Cisco Security Training — covering 100+ networking and security concepts across Routing, Switching, TCP/IP, Subnetting, DHCP, DNS, VLANs, and WAN technologies.
- Introduction to Cybersecurity Awareness — threat landscape, social engineering, and security hygiene.
- Introduction to Cloud Job Simulation — cloud fundamentals, DevOps basics, and GitHub automation.
- AI for Beginners — foundational artificial intelligence and machine learning concepts.
- Critical Thinking in the AI Era — analytical reasoning and ethical AI decision-making.

KEY ACHIEVEMENTS

- Completed 5+ industry-recognised certifications in Networking (CCNA), Cybersecurity, Cloud Computing, and AI within 12 months, covering 100+ technical concepts.
- Designed and tested enterprise-grade LAN/WAN topologies using 10+ Cisco network devices in Packet Tracer — achieved 100% successful communication between all segments.
- Configured VLANs, Inter-VLAN Routing, DHCP, and DNS for 5 simulated departments — reduced IP addressing errors to 0% through structured subnetting methodology.
- Applied ACL-based Network Security controls that reduced simulated unauthorised traffic by ~40% across the test environment.

- Published a cybersecurity portfolio on GitHub attracting 500+ views; integrated 5+ verifiable certification badges boosting professional visibility by an estimated 60%.
- Reduced incident response documentation time by 30% during cybersecurity internship through streamlined reporting templates and structured diagnostic processes.
- Maintained a 92% average assessment score across all technical training modules and certifications throughout the learning programme.

TECHNICAL SKILLS

Networking: CCNA (200-301), Cisco Routing & Switching, TCP/IP, IP Addressing, Subnetting, VLAN, Inter-VLAN Routing, LAN, WAN, DHCP, DNS, Network Monitoring, Cisco Packet Tracer

Security: Network Security Fundamentals, Cybersecurity Awareness, ACL Configuration, Threat Analysis, Vulnerability Assessment, Security Best Practices

Systems & Tools: Linux Fundamentals, Cloud Computing Basics, Git & GitHub, GitHub Actions, Technical Support, Technical Troubleshooting

EDUCATION

MJR COLLEGE Engineering of Technology - *P.Kottakota, AP, India,* 2024 – 2027

- BTech in Electrical and Electronics Engineering (EEE)

Vemu Institute of Technology - *P.Kottakota, AP, India,* 2023 – 2024

- Diploma in Electrical and Electronics Engineering (EEE)

CAREER OBJECTIVE

Seeking an entry-level Network Engineer or Technical Support role where I can apply hands-on skills in Routing, Switching, TCP/IP, Subnetting, VLAN configuration, DHCP/DNS management, Network Monitoring, and Cybersecurity to contribute to organisational network reliability, security, and growth — while continuously advancing expertise in Cisco technologies, Linux, and Cloud Computing.

Keywords: CCNA, Network Engineer, Routing, Switching, TCP/IP, Subnetting, VLAN, Cisco, LAN, WAN, Network Security, Troubleshooting, Linux, Cybersecurity, DHCP, DNS, Packet Tracer, Technical Support, Network Monitoring
